EMERGENCY PROCEDURES

Plan Ahead

- Please read the Fire Exit Plan on the back of the main door to locate the nearest emergency exit.
- In case of an emergency, take the room key card along. Be sure to close the door. Carrying a small flashlight may prove to be valuable.
- Do not use an elevator as a fire exit. Elevator mechanism can easily malfunction during a fire, causing persons to be trapped inside, or to be transported to the exact location of the fire.
- Do not panic. Panic can be avoided by being familiar with the surrounding and by following a specific plan of action if caught in a fire.
- The Fire Exit plan is specific for this requirement.

If there is a fire

- If there is any indication or even suspicion of fire, call the Hotel Operator immediately, or dial the Emergency no. 555. Caller identifies by name, room number, and a brief description of the situation.
- Feel the door with the palm of hand. If the door is warm, do not open. If the door is not warm, drop to the knees and slowly open the door, but be ready to slam it shut should a cloud of smoke roll in. If the corridor is clear, head for the exit, not the elevator. Ensure to close the door. Carry the room key card.
- Do not stand upright, but crawl or keep low to the floor to avoid smoke and odor less carbon monoxide. Stay on the same side of the wall to exit, counting the number of doors to the exit.
- On reaching the exit, walk quickly, but cautiously down the stairs following the emergency trail. If smoke is encountered, do not try to run through it, crawl on knees and proceed to the nearest open area or the poolside.
- Fill the bathtub with water. Wet towels and sheets and stuff them around the door and any vent that is allowing smoke to enter the room.
- If the doors and walls are hot, put water on them. The ice bucket in the room will come handy. Place the mattress up against the door and keep it wet to prevent the fire reaching the room. Tie a wet towel around the nose and mouth window.
- Do not jump from the room. It can cause serious injury. Signal from the room window for help.
